

INTEGRATION

At Panoramic, we recognize that each dental practice is unique. It is because of this that our digital panoramic imaging systems incorporate the latest technology built upon flexibility, compatibility, and value to meet the evolving needs of your office.

Our advanced imaging technology is equipped with TWAIN interface communication that allows our machines to seamlessly connect to your existing practice management or imaging software. Simple integration provides instantaneous access to patient images within your existing software for chair-side viewing and consultation.

Software integration and “compatibility” questions are very common when considering a digital transition in today’s dental practice. Panoramic Corporation incorporates universal communication technologies to easily connect with a comprehensive range of platforms for seamless image workflow. In the unlikely event that you cannot find your software listed above, give us a call to learn how your system is compatible with our advanced imaging equipment. Contact us directly at 800-654-2027, or email our Product Specialists at info@pancorp.com

Dr. Lorne Lavine, *The Digital Dentist*
